EU4Health Programa de Trabajo 2021- 1ª Ola Project Grants

Open: 29 julio

Deadline: 15
septiembre

EUROPE'S BEATING CANCER PLAN
LET'S STRIVE FOR MORE

#EUCancerPlan

DISEASE PREVENTION

Project on the quality and safety of radiation technology in diagnosis and treatment of cancer

Collection tasks in relation to updating the European Cancer Information System to monitor and assess cancer screening programmes

Inter-speciality cancer training programme

EU Network of Youth Cancer Survivors

HEALTH SYSTEMS AND HEALTHCARE WORKFORCE

Substances of human origin (SoHo): Increase resilience, ensure continuity of supply and access to safe and high quality therapies, in particular in time of crisis

Project on the quality and safety of radiation technology in diagnosis and treatment of cancer

OBJETIVOS

Enhance the quality and safety and optimise radiation technology in medicine

RESULTADOS/IMPACTO

- Contribute to improve the quality and safety of medical radiation applications,.
- Help to better align Euratom and EU health actions on safety and quality in medical and radiation applications
- Benefit cancer patients and the general population in accessing radiology and nuclear medicine services in the Member States.

ACTIVIDADES

Applicants shall target their proposal to one or more of the action strands described below :

- (a) Quality and safety of medical radiation applications:
- (b) Workforce education and training.
- (c) Equal access to modern medical radiation technology and interventions

Project on the quality and safety of radiation technology in diagnosis and treatment of cancer

EUROPE'S BEATING CANCER PLAN
LET'S STRIVE FOR MORE

#EUCancerPlan

Open: 29 julio

Deadline: 15
septiembre

Targeted beneficiaries:

- Academia and education establishment
- Research institutes
- Hospitals
- Expert networks including ERNs
- Enterprises in the field of public health
- Public authorities
- Established networks in the field of public health

Budget: 3.5M €

This action will be implemented in close cooperation with the Strategic Agenda for Medical Ionising Radiation Applications of nuclear and radiation technology (SAMIRA)

Collection tasks in relation to updating the European Cancer Information System to monitor and assess cancer screening programmes

OBJETIVOS

- Collection of the relevant cancer screening data from the Member States.
- Supports the linking of data provided by the cancer screening programmes into ECIS (European Cancer Information System) with a view to allowing the permanent monitoring of the screening programmes, including the performance indicators.

ACTIVIDADES

1. Preparatory work through meetings (5) and workshops (5) to create a platform in which data and indicators on population-based cancer screening programmes are collected, collated and further assessed under the European Cancer Information System.
2. Actions to support the first piloting of the platform developed under point 1, including collection of available datasets related to breast, colorectal and cervical cancer screening programmes.

RESULTADOS/IMPACTO

This action aims at improving the monitoring of the implementation of cancer screening programmes across the Union, and will have an impact on the implementation of such programmes by providing the Member States with evidence-based information to strengthen their programmes.

Collection tasks in relation to updating the European Cancer Information System to monitor and assess cancer screening programmes

EUROPE'S BEATING CANCER PLAN

#EUCancerPlan

Open: 29 julio

Deadline: 15
septiembre

Targeted beneficiaries:

- Established networks in the field of public health responsible for cancer screening

Budget: 2M €

Inter-speciality cancer training programme

OBJETIVOS

- Update the skills of healthcare professionals and foster the development of a high-quality workforce.
- Develop an inter-speciality cancer training programme focused on clinical oncology, surgery and radiology specialities, including their nursing services, as well as on patients' quality of life and well-being, including mental, psychosocial and nutritional support, along with patient empowerment.

ACTIVIDADES

- Development of first set of curricula to be delivered for the launch of the first training in inter-speciality oncology, targeted to clinical oncology, surgery and radiology, including their respective nursing services.
- Fine-tuning of needs assessments, namely estimation of the costing needed to support per centre involved and per person trained, taking into account the number of participants in the consortium.
- Selection and preparation of the first cohort of trainees who will participate in the inter-speciality oncology training.
- Selection and preparation of the cancer centres who will support and host the first cohort of trainees.

RESULTADOS/IMPACTO

Upskilling and re-skilling of healthcare professionals in the areas of clinical oncology, surgery and radiology, and related nursing services. This action will help the Member States to improve cooperation among their cancer services, by addressing skills gaps and better equipping the health workforce with personnel trained in cancer care.

Inter-speciality cancer training programme

Open: 29 julio

Deadline: 15
septiembre

Targeted beneficiaries:

- Academia and education establishment
- Research institutes
- Hospitals
- Expert networks including ERNs
- Enterprises in the field of public health
- Public authorities
- Established networks in the field of public health

Budget: 5M €

EU Network of Youth Cancer Survivors

OBJETIVOS

The action will improve the quality of life of children and young adult cancer survivors through improved social networking and the use of a platform to improve the links amongst individuals, patients, cancer survivors, and social and health professionals active in cancer prevention and care across the Union.

RESULTADOS/IMPACTO

- Expansion of the current support to improve the quality of life of young cancer survivors through networking
- Improve communication between children and adolescent cancer survivors, formal and informal carers, and civil society, and will strengthen the knowledge on how to better recognise the risk of getting cancer.

ACTIVIDADES

- Preparatory activities (first 6 months of the initiative). Through meetings and parallel consultations to define / agree on structure, modus operandi, secretariat, annual programme, and other operational and organisational needs, including a costing exercise of the EU Network.
- Launch of the EU Network (February 2022) – To be organised in the European Parliament and comparable to the launch of the Europe's Beating Cancer Plan in February 2021.
- Starting the activities of the Network through ad hoc missions/webinars/workshop, with the direct involvement of EU Network delegates and 'Ambassadors'.
- First general assembly of the Network Q3 2022.
- Throughout the project, wide visibility of the actions/initiatives of the EU Network will be requested.

EU Network of Youth Cancer Survivors

EUROPE'S BEATING CANCER PLAN

Open: 29 julio

Deadline: 15
septiembre

Targeted beneficiaries:

- Civil society organisations; associations, foundations, NGOs and similar entities.
- Private entities
- Public authorities
- Established networks in the field of public health

Budget: 5M €

Substances of human origin (SoHo): Increase resilience, ensure continuity of supply and access to safe and high quality therapies, in particular in time of crisis

OBJETIVOS

Enable the medical/professional organisations and Member State authorities in SoHO subsectors to develop and exchange good practices for professionals and authorities to optimise supply and increase access to quality and safe use of critical therapies based on substances of human origin donated by fellow citizen

RESULTADOS/IMPACTO

- Development and dissemination of good practices and guidance by medical professionals/associations
- Contribution to a more sustainable supply and increased access to essential SoHO therapies

ACTIVIDADES

Identify, share, assess and refine measures and actions taken and planned to mitigate the impact of the COVID-19 pandemic on safety, quality and accessibility: of these therapies.

- Identification of good practices and guidance for clinics and healthcare systems where existing.
- Development of good practices and guidance for clinics and healthcare systems.
- Dissemination/exchange of good practices between medical/professional association across the Union and Member States authorities.

On → blood and blood components (red blood cells, plasma);organs (e.g. kidneys, liver, heart); haematopoietic stem cells (bone marrow, cord blood);gametes and embryos (for reproductive medicine); tissues (corneas, heart valves)

Substances of human origin (SoHo): Increase resilience, ensure continuity of supply and access to safe and high quality therapies, in particular in time of crisis

Open: 29 julio

**Deadline: 15
septiembre**

Targeted beneficiaries:

- Professional medical societies

Budget: 3.5M €
